The agency’s overarching philosophy is based in the Neurosequential Model of Therapeutics (NMT), developed by Dr. Bruce Perry. NMT is a trauma-informed, developmentally sensitive approach to understanding the impact of a child’s history on current functioning. Guided by NMT, FamilyForward’s comprehensive services support the child, family, and broader community.

**TRAUMA ASSESSMENT AND PSYCHOLOGICAL EVALUATION**

- Trauma-informed, developmentally sensitive approach to understanding the impact of a child’s history on current functioning
- Individualized recommendations to support children at home, in school, and with therapeutic interventions
- Assessment, treatment, and parent education services provided by Developmental Trauma Center clinicians, specifically trained in the Neurosequential Model of Therapeutics (NMT)

**THERAPY**

- Individual, family, and group counseling provided in-home and in-office
- Trauma-focused counseling using evidence-based practices
OUR MISSION: FamilyForward moves vulnerable children in the direction of hope by delivering comprehensive therapeutic and educational services to support biological, foster, and adoptive families.
