How We Help

DEFINING THE NEED

On average, over 18,000 children in the St. Louis area reported to the Missouri Child Abuse and Neglect Hotline every year.

MAKING AN IMPACT

4,986 children, their families, and community members were served by FamilyForward in 2023.

METHODS

The agency's overarching philosophy is based in the Neurosequential Model of Therapeutics[™] (NMT), developed by Dr. Bruce Perry. NMT is a trauma-informed, developmentally sensitive approach to understanding the impact of a child's history on current functioning. Guided by NMT, FamilyForward's comprehensive services support the child, family, and broader community.
